

Contemporary Duplex Home

A contemporary duplex home designed for comfortable family living with coordinated architecture, structure, services and complete construction execution.

Project Overview

Project Type	Turnkey Residential Construction
Residence	Contemporary Duplex Home
Configuration	Duplex / G+1 Residence
Design Style	Contemporary family-focused architecture
Execution	Architecture, structure, services, construction and finishing

Turnkey Scope

- **Architecture:** floor planning, elevation design and working drawings.
- **Structure:** foundation, columns, beams, slabs and staircase as per approved structural design.
- **Civil Work:** masonry, plaster, waterproofing, flooring and associated construction works.
- **Electrical & Plumbing:** concealed services, wiring points, water supply, drainage and fixture provisions.
- **Doors & Windows:** frames, shutters/windows and standard hardware as per selected specifications.
- **Finishing:** wall preparation, paint, tiles, ceiling details and exterior finishes.

Design Highlights

- Well-planned duplex layout with clear separation of common and private family spaces.
- Contemporary front elevation with clean geometry and balanced material combinations.
- Comfortable living, dining and kitchen connectivity for everyday family use.
- Large openings for natural daylight and cross ventilation.
- Balcony / terrace elements and practical storage provisions.
- Coordinated architecture, structural design and MEP services for smoother execution.

Typical Space Planning

Ground Floor	Parking/porch, living room, dining, kitchen, guest/bedroom, toilet, staircase and utility spaces.
First Floor	Family lounge, bedrooms, attached/common toilets, wardrobe/dress spaces, balcony and terrace as required.

Execution Process

Requirement & Site Study -> Design & Planning -> Estimate & Specifications -> Structural/Civil Execution -> MEP Works -> Finishing -> Quality Check & Handover

NOTE: Final built-up area, dimensions, structural system, materials, brands, project cost and timeline will be finalized according to the actual plot, site conditions and client-approved requirements.
